PROFESSIONAL SUMMARY

B.Tech Computer Science (AI & ML) student with a 9.01/10 CGPA and hands-on experience in data analytics, machine learning, and generative AI. Completed a Data Analyst internship at Bluestock Fintech analyzing financial and mutual fund datasets with Python, SQL, and Pandas, and built deep learning applications in team projects spanning 3D medical image segmentation, computer vision, and generative AI. Google Gemini Student Ambassador driving AI literacy and responsible adoption of generative AI among students.

TECHNICAL SKILLS

Programming and Databases: Python, SQL, JavaScript, Java, C, PostgreSQL, MySQL, Jupyter Notebook, Git, GitHub, VS Code

Data Analytics: Pandas, NumPy, Matplotlib, Seaborn, exploratory data analysis (EDA), data cleaning and preprocessing, financial ratio analysis, dashboards and reporting

Machine Learning and Deep Learning: Scikit-Learn, TensorFlow, Keras, PyTorch, supervised and unsupervised learning, CNNs, 3D U-Net, model training and evaluation

Computer Vision and NLP: OpenCV, YOLO, object detection, image processing, NLTK, text preprocessing, tokenization, TF-IDF, sentiment analysis

Generative AI and Web: Google Gemini API, prompt engineering, AI agents, React, Node.js, Express, Flask, REST APIs

PROFESSIONAL EXPERIENCE

Data Analyst Intern, Bluestock Fintech **May 2026 - Jul 2026**

- Analyzed financial and mutual fund datasets using Python, SQL, and Pandas, performing data cleaning, exploratory data analysis, and fund performance analysis to surface actionable investment insights.
- Built components of a Financial Ratio Engine and a Screener and Peer Comparison module to compute and benchmark key financial ratios across funds and companies.
- Contributed to dashboard and valuation workflows, translating analysis into Matplotlib and Seaborn visualizations and stakeholder-ready reports and presentations.

Google Gemini Student Ambassador, Google / *Kalinga University, Raipur* **2026 - Present**

- Promote AI literacy and responsible generative AI adoption among students, demonstrating practical Gemini use cases for productivity, learning, and development.
- Support student-focused AI initiatives and campus events, mentoring peers in exploring Gemini and AI-powered workflows.

PROJECTS

NeuroInsight AI: 3D Brain Tumor Segmentation | PyTorch, 3D U-Net, FastAPI / LINK **Aug - Nov 2025**

- Team project: owned the preprocessing, training, and evaluation pipeline for a PyTorch 3D U-Net that segments brain tumors in multi-modal volumetric MRI scans, served through a FastAPI backend with Grad-CAM explainability.

SymptomIQ: AI Health Prediction Assistant | TensorFlow, Flask, Google Gemini API / LINK **Feb 2025**

- In a 2-member team, owned data collection, research, and data analysis (15 public medical datasets) for a Flask app that predicts health conditions from symptoms using TensorFlow and Gemini.

DeepFake Detector: Image Authenticity Classifier | TensorFlow, Flask / LINK **Jan - Feb 2025**

- In a 2-member team, co-developed a TensorFlow CNN image classifier served through a Flask interface that labels uploaded images as FAKE or REAL to help flag manipulated media.

Automated Power Monitoring System | YOLOv3, OpenCV, PyQt5, Arduino / LINK **Sep - Nov 2024**

- In a 4-member team, owned UI/UX design and documentation for a real-time system that detects people with YOLOv3 and switches appliances via Arduino to cut energy waste; won the Intra-Institutional Start-up Competition.

EDUCATION

- **B.Tech, Computer Science (AI and ML)** | Kalinga University, Raipur | CGPA: 9.01/10 **2023 - 2027**
- **Higher Secondary (Class XII), Science** | Radhika Senior Secondary School, Gorakhpur (CBSE) **2023**
- **Secondary (Class X)** | Oxford Public School, Gorakhpur (CBSE) **2021**

ACHIEVEMENTS AND CERTIFICATIONS

- Ranked in the Top 400 of 23,000+ participants in the PromptWars Virtual Challenge 1 (Google for Developers x Hack2Skill, 2026); Top 5 Finalist at the HackGenX Hackathon (2025); Winner of the Intra-Institutional Start-up Competition (2024).
- Certifications: 5-Day AI Agents Intensive (Google and Kaggle, 2026); Programming in Python and SQL (HackerRank, 2024); Artificial Intelligence and Machine Learning (Teach Nook, 2024).
- Awarded Best Anchor at school and college events for confident stage presence, event hosting, and communication skills.
